

REMARKS

The amendments to the specification include the addition of headings as mentioned in 37 C.F.R. 1.77(b). As mentioned in 37 C.F.R. 1.77(b) the elements of the application, if applicable, should appear in a certain order. The relevant headings have been added to the specification. Since there is no requirement under the rule to include headings that are not relevant these have not been added to the specification. Also, the specification has been amended to include reference to the drawing of Figure 1 which is submitted for addition to the specification.

Addition of the drawing with reference numbers is supported in the specification at the following locations:

Figure 1/Reference No.	Location of Support in the Specification
DB1	database for structural archetypes at page 4 line 20
C	Storage means on computer page 4 lines 1-2 and 21 and page 3 lines 20-22
DB2	database for colours at page 4 line 21-22
CL	Communication lines page 4 lines 3-5
S	Screen page 5 lines 1 and 4-6

It is respectfully submitted that with the aforementioned locations of support in the specification that the addition of the drawings does not add new matter to the application.

In the Office Action the lay out of the specification was noted and the specification has been amended to include appropriate headings.

Also, the Office Action noted that a drawing should be added. A drawing as Figure 1 is attached hereto and added to the specification without adding new matter.

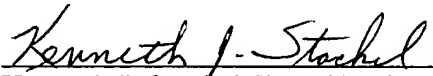

Previously submitted Claims 14-26 and 31 were provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent Application No. 09/899,587. A terminal disclaimer in regards to U.S. Patent Application No. 09/899,587 is submitted herewith.

In the Office Action Claims 27-30 were objected to as depending from rejected base claims. With the submission of the terminal disclaimer, it is respectfully submitted that the base claims are in condition for allowance so claims 27-30 are also in condition for allowance.

It is respectfully submitted that with the entry of the terminal disclaimer and inclusion of Figure 1 and appropriate headings for the specification, that the application with the previously submitted and original claims is in condition for allowance. Entry of this amendment, the drawings, and terminal disclaimer are respectfully requested and reconsideration and allowance is respectfully requested. If the Examiner needs to discuss any matter is preparing the notice of allowance, applicant's attorney can be reached by phone at the below-mentioned phone number.

Respectfully submitted,

Date: January 6, 2006
